CCI INSTALLS 6-COLOR DIGITAL HIGH-END OFFSET PRINTING SYSTEM

New equipment allows CCI to print up to 2 over 4 colors for short print runs

HARTLAND, WI (March 11, 2005) - Commercial Communications, Inc. (CCI), a leader in document and information management, installed a Heidelberg SM74DI-6-P+L Digital Offset System in its Tempe, Arizona production facility.

The Heidelberg SM74DI features a 6-color perfecter with an inline coater, allowing CCI to print any combination of colors up to 2 over 4 colors and offer an image size of 20" x 29". According to Steve Henck, Vice President of Production, "This new equipment will enhance CCI's print capabilities by allowing us to provide competitive solutions for high quality color applications in quantities of 500 – 50,000."

About CCI

Commercial Communications Inc. (CCI), founded in 1982, is a world leader in print-on-demand, inventory management, and document management solutions. CCI's total document management solutions are designed to support companies' literature, storage, fulfillment, and distribution needs and are based on a platform of e-business products referred to as The Zone Suite of e-Solutions.

CCI continuously lowers Total Cost of Ownership for its customers by bundling services into Value Packages that create complete solutions. CCI offers complete information distribution and management solutions to support companies' global needs.

Headquartered in Hartland, Wisconsin, CCI operates an additional production facility in Tempe, Arizona and sales offices in Illinois and Michigan. CCI can be found on the web at www.comcom.com.
