FOR IMMEDIATE RELEASE

CCI INSTALLS OCÉ'S BLM500 BOOK MAKER.

Inline book-making solution combines stitch, fold, spine-forming and face trim of eight to 200 pages in a single system.

HARTLAND, WI (October 31, 2007) - Commercial Communications, Inc. (CCI), a leader in intelligent production and document lifecycle management solutions, announces that they've been selected as one of the first U.S. installation sites for the Océ BLM500 Book Maker, a complete bookmaking system that runs inline with the Océ VarioPrint 6250 cut-sheet printer for a seamless, on-demand book-printing solution.

The Océ BLM500 is a complete bookmaking system for digital print applications and a fast, cost-effective alternative to perfect binding or tape binding. Automated settings accommodate different book sizes and thicknesses. The maximum book thickness of 10mm is double that of alternative conventional book making machines, making it suited for higher paginations or thicker stocks. And no other system offers the flexibility of eight to 200 page books on one system.

Finished books have the square-spined appearance of perfect bound volumes, with the security of a stitched spine. Books lie flat so they are easy to pack and stack. There's no risk of loose pages, and users can print on spines.

About CCI

Commercial Communications, Inc. (CCI), a family-owned business founded in 1982 by Bob and Barb Hegwood, is a world leader in intelligent production and document lifecycle management solutions. Through CCI's *Beyond Ink* business model and *Intelligent Production* processes, the company bundles services like traditional printing, print-on-demand, inventory management, eBusiness applications, and variable information applications into value packages that create complete solutions. These solutions are led by Publication Zone®, an intelligent production and lifecycle management software system. CCI's solutions enable companies across all industry sectors to provide the most accurate information in the most cost-effective manner to all stakeholders when, where, and how they need it. Headquartered in Hartland, Wisconsin, CCI operates an additional production facility in Arizona. CCI can be found on the web at www.comcom.com.

About Océ

Océ N.V. (NASDAQ: OCENY) is a leading international provider of digital document management technology and services. The company's solutions are based on Océ's advanced software applications that deliver documents and data over internal networks and the Internet to printing devices and archives – locally and around the world. Supporting the workflow solutions are Océ digital printers and scanners, considered the most reliable and productive in the world.
